

# Advanced Induction Course

PROFESSIONAL AVIATION TRAINING  
ACADEMY - MALTA

## INFORMATION PACK

[www.maltaflying.com](http://www.maltaflying.com)

The Advanced Induction Course is offered alongside the summer PPL course during July and August. It can be done over a period of 3 years, after which the student would have covered all the PPL subjects.

- 1st year – Communications, Aircraft General Knowledge, Flight Planning & Performance – Total: 28hrs
- 2nd year – Human Performance, Principles of Flight, Meteorology – Total: 32hrs
- 3rd year – Air Law, Operations, Navigation – Total: 40hrs

At the end of each subject the student has to do a project that relates to the subject, so there are no tests. The final pass mark will be the average for the 3 projects.

Note that students cannot get credit for these subjects towards the PPL, but it offers a great advantage over students who have not done the subjects at all.

The cost is €495 and includes a 30-minute simulator session, if done alone, or 60 minutes if done with another student of the same group.
